

Important update to our Vaccination and testing policy

Requirements for the majority of holidays

	Covid-19 vaccinations required		Covid-19 test recommended
	Fully vaccinated (a minimum of 14 days prior to travel)	Booster vaccine (a minimum of 7 days prior to travel)	(3 days prior to embarkation)
Guests aged 18 years and over	✓	✓	✓
Guests aged 5 – 17 years who are fully vaccinated	✓	✗	✓
Guests aged 5 – 17 years who are not fully vaccinated	✗	✗	✓♦
Children aged 4 years and under	✗	✗	✗

All guests 18 years of age and older must be fully vaccinated* with an approved COVID 19 vaccine at least 14 days prior to travel. If more than 270 days (calculated from the last day of the cruise) have passed since a vaccination was fully completed, a booster vaccination is also required and must be administered at least seven days prior to travel.

Guests who have received a booster vaccination are considered fully vaccinated regardless of the date. Currently, a second booster vaccination is not required. However, we strongly recommend that all guests receive a booster vaccination as soon as possible, if available, to comply with the evolving vaccination requirements of the countries we visit.

Guests aged 17 and under do not need to be vaccinated.

**The definition of "fully vaccinated" means that an approved (by the Medicines and Healthcare products Regulatory Agency (MHRA), the European Medicines Agency (EMA) or the World Health Organization's Emergency Use Listing (WHO EUL)) Two-dose COVID 19 vaccination or the approved single dose of Janssen COVID 19 vaccine (and booster vaccination, if applicable) has been given.*

Testing requirements

Although testing is no longer compulsory, we strongly recommend that all fully vaccinated guests aged five years and over take a COVID 19 antigen test in the 3 days before or on the day of departure.

Guests aged 5 to 17 years who are not fully vaccinated must take a COVID 19 antigen test in the 3 days before or on the day of departure. They no longer need to provide a test certificate, but must be able to provide photo evidence of the negative test upon request. Guests will also be asked to confirm compliance with the testing requirements as part of the health declaration prior to embarkation at the cruise terminal.

Children up to and including 4 years of age do not require vaccination or testing for embarkation.

Holidays with additional requirements

	Covid-19 vaccinations required		Covid-19 test required
	Fully vaccinated (a minimum of 14 days prior to travel)	Booster vaccine (a minimum of 7 days prior to travel)	(2 days prior to embarkation)
Guests aged 18 years and over	✓	✓	✓
Guests aged 5 – 17 years who are fully vaccinated	✓	✗	✓
Guests aged 5 – 11 years who are not fully vaccinated	✗	✗	✓
Children aged 4 years and under	✗	✗	✗

All guests aged 12 years and over need to be fully vaccinated*, with a recognised COVID-19 vaccine, a minimum of 14 days before travelling.

For guests aged 18 years and over, if more than 270 days (calculated from the last day of the cruise) have passed since the full completion of a vaccination course, a booster vaccine will also be needed and must be administered a minimum of seven days prior to travel.

Guests under 12 years of age are not required to be vaccinated.

Guests who have had one booster vaccine, regardless of the date, are considered fully vaccinated. At this time, a second booster vaccination is not required, however, we strongly recommend all guests to have booster vaccinations at the earliest opportunity, should they be available to them, in order to comply with evolving vaccine policies from the countries we visit.

*The definition of 'fully vaccinated' is having completed an approved (by the Medicines and Healthcare products Regulatory Agency (MHRA), European Medicines Agency (EMA) or the World Health Organization's Emergency Use Listing (WHO EUL)) two-dose COVID-19 vaccination course, or the approved single-dose Janssen COVID-19 vaccine (plus a booster if applicable).

Testing requirements

All guests aged five years and over must organise and pay for an observed or in-person COVID-19 lateral flow/antigen test to be taken in the two days before, or on the day of your ship's departure. This test must be medically observed via a mobile device or conducted in-person by a government approved testing provider. Please note, testing facilities will not be available at the cruise terminal or airport.

Guests who are unable to provide their proof of vaccination status and a valid negative COVID-19 test certificate, as required, will unfortunately be denied boarding.

Guests aged four years and under remain exempt from all pre-travel vaccination and testing requirements.
